https://github.com/kmruban

## EDUCATION

COASTAL CAROLINA UNIVERSITY

Graduation: June 2022

Major: Computer Science

## SKILLS

React
Typescript
Node
C#
Java
MySQL
MongoDB
GitHub
WebGL
Unity

## COURSE HIGHLIGHTS

-**Analysis of Algorithms**

-**Database System Design**

-**Systems Analysis & Software Engineering**

-**Organization of Programming Languages**

-**Software Engineering II**

-**Computer Graphics**

## CURRENT PROJECTS

### Finance Application — *In Development*
GitHub Link: https://github.com/kmruban/mern-finance

- Full-stack responsive web application that allows users to easily track their finances.

- Implemented JSON Web Tokens for login and authentication as well as Bcrypt to securely store a user's password.

- Utilized React, Node, Express, Mongoose and MongoDB to create the application.

### Amazon Application
GitHub Link: https://github.com/kmruban/mern-amazon

- Replication of an Amazon E-Commerce store which enables consumers to register and login to accounts to make purchases of products currently listed.

- Built authentication to allow admin users the option to create new products, view registered users, track orders made, and track sales data.

- Utilized React, Node, Express, Mongoose and MongoDB to create the application.

### Movies Application
GitHub Link: https://github.com/kmruban/react__dotnetcore__moviesapp

- Application to display movies, genres, actors, and movie theaters. Also allows admin users to create new data using Formik forms

- Utilizes Typescript, ASP.NET Core, and SQL Server to create the application.

### Personal Portfolio
Website Link: https://kyleruban.netlify.app
GitHub Link: https://github.com/kmruban/kruban__portfolio

- React web application to showcase my skills and projects as a full-stack engineer.

- Utilized data stored in the application to display each skill and project listed.

## WORK EXPERIENCE

### Boston Realty Advisors, Boston MA — *Intern*
June 2021 - September 2021
-Assisted firm with  increasing website traffic and helped generate more leads for sales and rentals of properties.
-Added and updated property listing pages on the website through a CMS while providing information about the property in the listing.
-Audited database of homeowners information in surrounding  areas and  generated weekly list of leads.
-Created comprehensive database of Nantucket homeowners using land records and research for each property.
-Assist on weekly meetings to plan UI designs to appeal more to the end user.
